

KAUSHAL GOHIL

Full Stack Web Developer (MERN / MEAN) | AI-Integrated Applications | 3+ Years

Surat, Gujarat | (+91) 8799303752 | gohilkaushal16@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 4+ years of experience building and shipping production-grade MERN/MEAN applications. Proven track record architecting scalable web platforms, engineering enterprise-grade financial security workflows, and integrating AI/LLM APIs (OpenAI, Claude) into real-world products. Experienced with real-time systems (Socket.io, WebRTC/Janus.js), TypeScript-first codebases, and agile cross-functional teams. Actively building AI-powered SaaS products (Voyager AI, PulseCheck.ai) alongside professional work, demonstrating strong self-starter orientation and full product ownership.

TECHNICAL SKILLS

Frontend: React.js (Hooks, Redux, Redux Toolkit), Next.js (App Router, SSR), Angular (AngularJS, NGRX, Material), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, NestJS (basic), REST APIs, GraphQL (basic), Socket.io, WebRTC / Janus.js

Databases: MongoDB, MySQL, PostgreSQL (basic), Redis (basic)

AI / LLM Integration: OpenAI API, Anthropic Claude API, OpenRouter, AI prompt engineering, structured JSON schema design

Cloud & DevOps: Firebase, Vercel, Netlify, AWS (S3, basics), Docker (basics), CI/CD pipelines

Tools: Git, GitHub, GitLab, Postman, VS Code, WebStorm, Supabase, Google Maps API, Leaflet.js

PROFESSIONAL EXPERIENCE

Full Stack Web Developer · Appgambit, Surat, Gujarat

June 2024 – Present

- Lead architect of the TNT (Track & Trace Cash) application engineered end-to-end secure financial transaction workflows, guaranteeing high-volume monetary transfer integrity from customers to bank systems.
- Designed and maintained complex MySQL / SQL database schemas for enterprise-level security modules, enforcing strict data integrity and audit-trail compliance.
- Collaborated within an agile squad to ship scalable full-stack features across React + Node.js codebases, consistently improving application performance and test coverage.
- Integrated third-party APIs and implemented role-based access control (RBAC) for sensitive financial data modules.

MEAN / MERN Stack Developer · Daydreamsoft Infotech LLP, Surat, Gujarat

October 2022 – June 2024

- Co-developed a secure, real-time Video Call platform for the deaf community using Janus.js / WebRTC — enabling high-quality video streaming with an accessibility-first UX.
- Built Gamerznet.net, a social media platform for gamers, implementing real-time chat reactions using Socket.io for sub-100ms message delivery.
- Partnered with senior engineers to resolve critical production bugs and deploy features across a portfolio of web applications, cutting issue resolution time by ~30%.
- Standardized version control workflows using Git (feature branching, PRs, code reviews), improving team collaboration and deployment reliability.

Lab Coordinator · Red and White Multimedia Institute, Surat, Gujarat

May 2021 – October 2022

- Mentored students in modern web development practices (HTML, CSS, JavaScript, basic frameworks) and provided hands-on technical troubleshooting.

TECHNICAL PROJECTS

Voyager AI — *AI-Powered Travel Itinerary SaaS* | *Next.js · OpenRouter · Claude API · Supabase · Google Maps API · Leaflet.js*

- Built a full-stack AI travel itinerary generator with freemium monetization, authentication gates, and structured JSON schema for AI output parsing.
- Integrated OpenRouter (Claude/OpenAI models) with a custom prompt pipeline and TypeScript schema for deterministic itinerary generation.
- Implemented Leaflet.js map rendering with tile-layer optimizations and Google Maps Route Optimization API integration.

PulseCheck.ai — *AI Habit Tracker* | *React · Node.js · OpenAI API*

- Developed an AI-powered habit tracking application using LLM-generated intelligent summaries and personalized guidance to help users build consistent routines.

TNT – Track and Trace Cash — *Fintech* | *Node.js · MySQL · Angular · React*

- Architected secure multi-step cash transfer workflows with encryption, audit logs, and role-based access for enterprise clients.
- Engineered backend logic for high-volume financial transaction processing with zero data-loss guarantees.

Real-Time Chat Application — *Angular · Node.js · Socket.io*

- Built a full-featured real-time messaging platform with file transfers, friend management, typing indicators, and emoji reactions via Socket.io.

Video Call Platform for Accessibility — *React · Node.js · Janus.js · WebRTC*

- Designed a Zoom-like video conferencing platform purpose-built for the deaf community, with high-quality video streaming via Janus.js media server.

Dermamatrix — *Niche Matchmaking Platform* | *MERN Stack*

- Collaborated on a matchmaking application for users with skin conditions, delivering custom compatibility algorithms and a responsive UI.

EDUCATION

Diploma in Computer Science

Mahavir Swami College of Polytechnic, Surat, Gujarat
